Subject: FYI - Drone Program Aims To "Accelerate" Use Of Unmanned Aircraft By Police
Date: Thursday, May 24, 2012 3:48:00 PM

Gentlemen, the article/link below deals directly with some of the issues surrounding the use of drones by police.

I've spoken with Tim (and will be contacting William)...so, we can expand on the great research they have already done and get a good idea of what the costs, timeframes, benefits, and threats are with police using drones....looks like Arlington, TX is already working with them.

This will take us a bit before we have all the questions identified and then find the answers to those questions.

ps: The comments left by readers are pretty colorful too...
